Follow and learn the evolution of all humans beings with Professor Darwin Books!

NEW!

What are microbes? Individual living organisms formed by a single cell that are essential for life on Earth. Capable of the very best and the very worst, from releasing the oxygen that we breathe into the atmosphere to making us ill and even causing epidemics and pandemics.

Let's venture inside this miniscule world of microorganisms and discover these fascinating creatures.

How can it be that there is so much variety of life on Earth and that all living things seem to be made on purpose? In this book we explain how biological evolution has shaped life and you will also discover that we are all family, that we have a common ancestor with absolutely all the beings that have inhabited the Earth. Immerse yourself in the fascinating history of life on our planet. Are you coming with us?

Eduard and Sheddad have been lifelong friends Sheddad is a physicist and pharmacist who is passionate about knowledge. Eduard is an illustrator and graphic designer. Both share the same inclination and interest in making understandable what ordinary mortals do not think so: physics, engineering, genetics... that is, science and technology.
